DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a receiver comprising a signal processor and a demodulator, classified in class 370, subclass 328.
 - II. Claims 12-41, drawn to a beam former and channel estimator, classified in class 370, subclass 335.
 - III. Claims 42-54, drawn to a method for determining communication channel attributes, classified in class 455, subclass 562.
 - IV. Claims 55-68, drawn to a remote unit comprising a receiver and transmitter, classified in class 455, subclass 103.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a receiver comprising a signal processor and a demodulator, a beam former and channel estimator, a method for determining communication channel attributes, a remote unit comprising a receiver and transmitter are classified in different classes and subclasses as mentioned above. The subcombination has separate utility such as a receiver comprising a signal

processor and a demodulator, a beam former and channel estimator, a method for determining communication channel attributes, a remote unit comprising a receiver and transmitter.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Ross Viguet on 04/20/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Q Nguyen whose telephone number is 703-605-4254. The examiner can normally be reached on 8:30AM-5:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Erika A Gary can be reached on 703-308-0123. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
